What I can say about Shannon is she was my friend we hung out in high school played band together, band reviews, played sports, school dances, but most of all we graduated class 2003. I recently gain contact with her sometime last year I was shocked because she wasn't the same Shannon I knew but I was there for her through it all got her a spot to stay and everything we became bestfriends I loved her so much and if it goes on I will see justice is served since that was one of the reasons I were coming I shouldn't of never let u go when I asked u were u sure u said yea I knew it was a reason I started crying but it's ok I love u and to her aunt Tracy she talked about you so much she wanted me to meet you so I hope I do real soon and as for her.kids.she loved you all she talked about was u'll so always remember that don't let no one tell u different and to Cassie and the rest of her family my condolences goes out to the rest she had a good heart and will never be forgotton

I would like to say that I didn't know shannon very long but for the time we had together she was really great and lovely We went shopping together one day She drove my car and we had a very nice time. Shannon was a very special person the type of person whom made you feel good when your around her and If she fixed the collar on you jacket She would do that often.Her touch was so warm and loving it made you feel good inside That's what I will always remember. She went threw her high school year books with me and her old stuffed bears.Shannon Tony and I went to go get you.When you were not on the bus.we waited then went to a friends to wait longer and you didn't answer the phone. I was thinking when we get Shannon we're gonna have fun. Then the next day we heard you pass away .How can that be true I didn't believe it until right now. When I seen this obituary I don't want to see your face on that photo I wish it was not you. I'm so sorry this happened to someone I though would be my friend for the rest of my life Rest In Peace Shannon love Violet
